The most spectacular projects are based on collaboration. Where different temperaments and different points of view are bound to clash. At the intersection of two independent points of sensitivity. This is how our latest collection of light fixtures came into being - designed by two talented designers: graphic designer and graduate of art school in Poznań, Poland and co-owner of LSE Lighting Ltd. design studio in Worcester, UK.

## ANNA SOŁTYSIAK & JAMES MANSFIELD

This collection is as diverse and unique as the personalities of its creators. The metal pendant lamps are available in many shapes and sizes. With a symmetrical or asymmetrical arrangement of light sources. And ornamentation that can be subtly outlined or completely smooth. Finished with wooden plywood, felt or natural bristles. It's up to you to choose the combination that you want. In this case, however... each choice will be the right one. We are pretty sure about this.
